

# Md. Mizanur Rahman

Aspiring Software Engineer

[mizanururahamanjisan12@gmail.com](mailto:mizanururahamanjisan12@gmail.com) | [Portfolio](#) | [Github](#) | [Linkedin](#)

Dhaka, Bangladesh • 01752-730364

## Skills

---

Language : C, C++, Python, Java, PHP, HTML, CSS, JavaScript  
Framework : Laravel, Django, React Js  
Database : MySql, Postgres Sql, Firebase  
API Testing : Postman  
Artificial Intelligence : Machine Learning, Deep Learning ( Learning Phase)  
Mobile Application Framework : Flutter (Basic)

## Professional Summary

Software Engineer and **Final-Year CSE student** with hands-on experience building production-grade web applications and scalable backend systems using Django, Laravel, PostgreSQL, and React. Contributed to commercial products across travel-tech, enterprise, and AI-driven domains, including large-scale platforms integrating third-party services such as Sabre APIs. Strong foundation in software engineering, system design, RESTful APIs, and database architecture, complemented by a CGPA of **3.93/4.00** and a passion for solving real-world problems through technology.

## Experience

---

[Innovation Lab 360](#)

Sept 2024 - Present

### Backend Developer

- Built and maintained scalable backend services using Laravel, Django REST Framework, PostgreSQL, and cloud-based deployment environments.
- Delivered production-ready solutions across multiple commercial projects serving real-world business operations.
- Developed and integrated complex travel booking workflows using Sabre APIs for flight and hotel reservation systems.
- Contributed to Nusuki, a comprehensive travel-tech platform supporting Hajj, Umrah, Visa, Study Abroad, Holiday Packages, Flights, and Hotels.
- Designed RESTful APIs, database schemas, authentication systems, and third-party service integrations following modern backend engineering practices.
- Collaborated in agile development teams, participating in architecture discussions, feature development, deployment, and system maintenance.

## Education

---

University of Asia Pacific

Jan 2023 - **Present**

B. Sc. in Computer Science and Engineering

CGPA - **3.94 / 4.00**

- I've my **Passion**, my dream and my dedication for this Subject
- Completed **7 Semester** and **8th Running**
- Got **5 VC Award** and **1 Deans Award**
- Placed **30th** in IUPC by solving 5 Programming Problems
- **Champion** of Intra University CTF Contest 1.0

- **56th** in MIST Leetcon 2023 Contest
- Selected as a **Top 20** team out of 65+ teams in Impact Dhaka, **Bangladesh's first AI Hackathon** organized by **Japanese Company Cognisor AI**
- Solved over **270+** Programming problems in [Codeforces](#) and **30** in other platforms
- Participated in a hackathon called **HackTheAI** and built APIs using FastAPI

#### **Military Institute of Science & Technology (MIST)**

Jan 2022 - Jan 2023

##### **B. Sc. in Nuclear Science & Engineering**

- Was only my First Semester there
- Realised this subject is not for me, I didn't find any motivation to continue with this subject
- So Changed my decision and left out from MIST

#### **Birshrestha Noor Mohammad Public College**

Jan 2019 - Dec 2021

##### **Higher Secondary Certificate ( HSC )**

- GPA-5.00
- Physics ,Chemistry, Math Total Marks 589/600
- Was Captain of my Section ( E )

#### **Firoza Bashar Ideal School & College**

Jan 2017 - June 2019

##### **Secondary School Certificate ( SSC )**

- GPA-5.00
- Was Captain of my Class

## **Projects**

#### **NusukiBD - A Govt Approved Travel Agency - 2026**

[Website Link](#)

- NusukiBD is an online travel agency website that provides Hajj, Umrah, Hotels, and international travel services.
- Built whole Backend System & API
- Implemented Sabre Flights API
- Backend used Laravel
- Admin Panel built in Filament

#### **Bangla AI - 2026**

[Website Link](#)

- Led end-to-end development and deployment of an AI platform, covering architecture, cloud infrastructure, backend, and frontend.
- Engineered scalable Django/DRF APIs with PostgreSQL (pgvector) for AI-powered document processing.
- Integrated OpenAI, OCR, and multilingual document analysis pipelines.
- Built a modern React-based interface focused on performance and usability.

#### **LLM Vertex - 2025**

[Website Link](#)

- A Company website located in USA
- Built in React Js and Tailwind CSS
- USA Project

## **LLM Vertex Workforce Development - 2026**

[Website Link](#)

- Workforce development site
- Built in React Js and Tailwind CSS
- Stripe payment method integrated
- Backend used Django Rest Framework
- USA Project

## **CINTRACON V2 - 2025**

[Website Link](#)

- CINTRACON is a student-driven social media platform
- It connects students, alumni, and professionals
- Enabling them to share knowledge, experiences, and opportunities
- Built in Django Rest Framework , React Js, Tailwind CSS and Open AI API

## **Contractor Connect App Backend API - 2025**

NDA Project

- This app is a service contractor marketplace platform
- Designed to connect qualified, accredited contractors
- with both residential and commercial clients in the USA
- Built only Backend API for this app
- Using Laravel & MySQL
- USA Project

## **HavenHood App Backend API - 2025**

NDA Project

- HavenHood is a mobile-first community platform
- Designed to support both caregivers and patients navigating medical, emotional, and developmental challenges
- The app connects users through condition-specific HavenHoods where they can access support, resources, and events tailored to their journey in the USA
- Built only Backend API for this app
- Using Laravel & MySQL
- USA Project

## **Farm App Backend API - 2024**

NDA Project

- FarmApp is a smart farming application that continuously monitors crop conditions using machine learning
- When harmful insects or leaf damage is detected by connected devices, the app instantly alerts the farmer
- This helps farmers take quick decisions and apply proper care to protect their fields
- Built only Backend API for this app
- Using Laravel & PostgreSQL, AWS S3 bucket, Python
- USA Project

## **Shopnoneer Mobile APP - 2024**

[APK File](#)

- Shopnoneer is a real estate mobile application that provides detailed information
- About plots, flats, and various properties near you
- Users can easily find and explore all property listings available for sale in their area
- Built with Flutter
- Contributed to API integration, enhanced UI components, and improved overall app performance
- Was my first APP building Experience

## Deployment Experience

---

- 2+ years of experience deploying and maintaining production applications on cPanel shared hosting
- Hands-on experience with Cron Jobs, SMTP & Email Setup, MySQL Databases, Terminal/SSH, Subdomains, DNS, and SSL configuration.
- Experienced in deploying React.js applications on Vercel and Netlify with custom domain integration.
- Experienced in deploying Django applications on Railway with PostgreSQL and production environment configuration.

## Courses

---

### CSE Fundamental with Phitron Fall 2022 Batch - 02

[Website Link](#)

- Learned core programming fundamentals
- Practiced problem-solving using C, C++, and Python
- Studied Data Structures and Algorithms
- Worked with MySQL for database management
- Gained hands-on experience with Django and React.js
- Introduction to AWS services

### Phitron AI/ ML Batch - 01

[Website Link](#)

- Studying Artificial Intelligence concepts
- Learning Machine Learning and Deep Learning techniques
- Exploring NLP and Computer Vision fundamentals
- Course Running

### Ethical Hacking - Eshikhon

[Website Link](#)

- Completed a course on Ethical Hacking
- Learned core concepts of security analysis and penetration testing

### Supervised Machine Learning - Coursera

[Website Link](#)

- Completed a course from Andrew Ng.
- Learned core concepts of supervised machine learning Regression and Classification
